# SUSHI RAT REVOLUTION

## OBJECTIVE:

Be the first player to get 3 points by collecting ingredients from the kitchen and yell "Order Up!" before another player yells it out.

BY: TEAM 4/SUSHI

## Components:

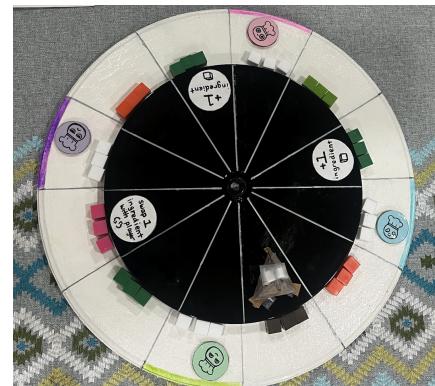

- Player Tokens
- 36 Ingredient blocks
  - 12 rice (white)
  - 9 seaweed (dark green)
  - 6 salmon (orange)
  - 3 wasabi (light green)
  - 3 avocado (brown)
  - 3 shrimp (pink)
- 12 Sushi Order cards: each recipe and point value
- 24 Conveyor cards: Rotates the conveyor layer
- 1 d8 dice
- Circle Board
  - Black Conveyor: Rat movement & special Action Sections
  - White ring: the player movement & kitchen slots

## Board Anatomy & Terms:

- Kitchen Section: Each section has a pile for 1 ingredient type that holds 3 of the same ingredient. Players will be moving on this layer.
- Conveyor Layer: The rotating middle black ring spaces. Some are Action Sections labeled with words/icons and the Rat that is trying to take your ingredients
- Corresponding Space: Each White Ring space lines up radially with one Black Conveyor space. That aligned conveyor space determines your action and ingredient.

## Set Up:

- Pick your player token to play with.
- Shuffle the Sushi Order cards, put them face down, and deal 4 face-up cards. Place each card where everyone can see them.
- Shuffle the Conveyor Cards and place them aside for now.
- Place 3 ingredients in each of the corresponding sections of the kitchen. Follow the example picture.

- Players start on the slot with the corresponding color of their player token.
- The youngest player goes first.
- Rotate the conveyor such that the rat is placed one space to the right of the first player.
- Players take turns clockwise.

## Playing the Game:

### a. Roll & Move

- i. Roll the dice: Move your token in any direction, up to the amount that the player has rolled on the white ring.
- ii. Complete the action on the corresponding Conveyor space where you land (if any). Afterwards, take 1 ingredient that corresponds to that same space.
- iii. Be worried about the Rat! If the player lands on the same space as the Rat, the player CANNOT take any ingredients.
- iv. Remember, the player can choose how many spaces they move. You are only limited by the total dice roll.

### b. The Rat

- i. Once the player is finished moving, they must draw 1 Conveyor card that tells how many spaces the black plate rotates clockwise.
- ii. If the Rat moves past or lands on the player's space, he steals half of your ingredients (rounded up) of the player's choosing. These ingredients go back to the kitchen!
- iii. Even when it isn't the player's turn, the Rat steals ingredients!
- iv. Some of the Conveyor cards have a special move, make sure to read them.
- v. Remember, the action space(s) doesn't matter when the Rat moves!

### c. Make Sushi

Once the player has ingredients for the Sushi Order Card to be completed, that sushi can be made.

#### i. Call “Order up!”

1. Race to call: If another player says “Order up!” before you, you must give that player the 1 ingredient of their choice.

#### ii. Tally up the points

1. Once the order is complete, the player receives the corresponding points to the Sushi Order card.
2. Place back ingredients of the completed Sushi Order card in the kitchen!

#### iii. Replace the finished Sushi Order card with a new one if the game isn't completed.

## Winning the game

The game ends when any player obtains 3 points worth of sushi cards.

## Commonly asked questions

**Q: What Cards can I complete?**

A: Any that is laid out.

**Q: How many ingredients can I take?**

A: 1 at once. Unless you land on an action space with a +1.

**Q: Do I have to do the actions?**

A: Yes! Unless you are swapping and don't have ingredients.

**Q: What are the actions?**

A: There are two actions.

1. Swap 1 ingredient with another player of your choosing. If you do not have any ingredients, the action is skipped.

2. +1 ingredient means that you can grab 1 more ingredient from that space.

**Q: When do you call “Order up!”?**

A: When you pick up your final ingredient.
