

Game Jam Architecture

Project Theme: Overstimulation

Core Mechanic: Audio driven word selection

High Level:

Dialogue → Main Mechanic (audio+words) → (repeat) → Ending

Main Mechanic:

Simplified: Point-and-Click Search based on Audio

- The player will be fed a dialogue audio line
- While the dialogue is playing different “thoughts” will appear on screen to be used as responses
- The player has a limited amount of time to respond to when the audio is finished (Quick Time Event)
- Add a timer visual and that area does not spawn thoughts near it
- The responses can not be selectable when the audio is playing, but the dialogue appears when the audio is playing

Moment-to-Moment Gameplay:

- 1) Mom's Audio Plays
- 2) Different Dialogue appears during the audio (Hardcoded timestamps)
- 3) Mom's Audio Ends
- 4) Selectable timer starts (~10 seconds)
- 5) Player selects a dialogue to the best of their ability
- 6) New Mom Audio starts based on Option

Unity Features

UI appearing at randomized spot on screen (Kaylee)

- Selectable -> Button prefab

Dialogue Timer

Audio Clip System (Michelle)

- Scriptable Object
 - Audio Clip
 - List (Relevant UI words/sentences) (of class ClipResponse)
 - *ClipResponse*
 - *Response*: text to put on button (string)
 - *NumToSpawn*: how many response buttons to spawn (int)
 - *ChoiceType*: choice type for route (enum)
 - *SpawnTime*: time to start spawning the button (float)

- *NextClipToPlay*: dialogue consequence (AudioClipSO)
- Int (Audio Clip Length)
- Audio Clip SO (Clip to play if no button is selected)

Design Conversation Flow (KT)

- Flow Chart of responses and relevant audio

Main Menu Set Up (Michelle)

- Pause and Quit Buttons
- Credits Page

Random Things we still need

- Sprites for Parent
- Sprites for who ever is being talked to
- Code to change the mom sprite while she's speaking
 - Based on the type of response the player picks (combative, timid, focused)

Things to keep in mind for Dialogue Spawning:

Buttons cannot overlap

They cannot overlap the timer or pause buttons

They should have specified sizes and frequency (Button Personality)

To Do List:

Art (Michelle)

- ☒ ~~Text background assets~~
- ☐ Decide on Text Font
- ☐ Design Title/Logo
 - ☐ "Reaching Out"
 - ☐ "A talk with Mom"
 - ☐ "Hell is my Mother"
 - ☐ "Mom, please"
 - ☐ "Meeting Halfway"
 - ☐ "Expectations"
 - ☐ "Say Something"
 - ☐ "The Quiet Part Out Loud"
 - ☐ "Left Unspoken"
 - ☐ "Things Left Unspoken"
 - ☐ "I'm dropping out of college"

- ☐ “Made in your image”
- ☐ “Think before you speak”
- ☐ “Speak before you think”
- ☐ “How do I say this?”
- ☐ “How do I tell you?”
- ☐ I have no mouth but I must scream
- ☐ “Assumptions”
- ☒ ~~Splash Page (Endings)~~
 - ☒ ~~Mom missing (Combative End)~~
 - ☒ ~~Neutral (Timid End)~~
 - ☒ ~~Reaching out ahaha (Focused End)~~
- ☒ ~~Sprites~~
 - ☒ ~~Mom (Variations?)~~
 - ☒ ~~(Angry, Neutral, Caring)~~
 - ☒ ~~Background~~
 - ☐ ~~Text Box~~
 - ☐ Trying to figure out how to animate them
 - ☒ ~~Hand for mouse cursor~~
 - ☒ ~~Slider~~
 - ☒ ~~Pause button~~

Audio (KT)

- ☒ ~~Record Audio Clips~~
- ☒ ~~Implement in Game (Unity Dialogue System)~~
- ☒ ~~Document Time stamps for when Dialogue should appear~~

Programming (Kaylee and Michelle)

- ☒ ~~Edit audio clip SO~~
 - ☒ ~~Different choice types~~
 - ☒ ~~Selection period~~
- ☒ ~~Implement timer~~
- ☒ ~~Mouse cursor~~
- ☒ ~~Clip manager~~
 - ☒ ~~Wait for timer or **button press**~~
- ☒ ~~Button spawning~~
 - ☒ ~~Not interactable until dialogue is done~~
- ☒ ~~Background audio manager~~
- ☒ ~~Code to change the mom sprite while she's speaking~~
 - ☒ ~~Based on the type of response the player picks (combative, timid, focused)~~

- ☒ Endings
 - ☒ Based on the type of response the player picks (combative, timid, focused)
- ☒ Credits page
- ☒ Subtitles
- ☒ Sound Effects (Click SFX) (Low Priority)
- ☒ Settings volume sliders

Narrative (KT)

- ☒ Finish Dialogue Tree
- ☒ Edit Story
- ☐ Create ending epilogue
 - ☐ Sound Design (Mother leaves the restaurant)

Design (KT)

- ☒ Make more fleshed out design documents

Marketing/Production (Kaylee)

- ☒ [Itch.io](#) page
